

PROJECT NAME: TSCA PCB Annual Report Preparation

PROJECT DESCRIPTION:

EIS Personnel reviewed 40 CFR part 761.180 for appropriate reporting requirements for a brewer located in Golden, Colorado. Areas covered included the client's procedures for removal and replacement of PCB articles, document location, and manifest files. Mr. Lieberman met with appropriate personnel to examine in-service transformers, inspection log, and capacitor status. A report was completed for the facility. The report included an introduction; a summary of PCB transformers and capacitor status; excerpts from 40 CFR; facility information; unique manifest number for each PCB shipment; in-service transformer report; bulk, article, and PCB container tables; and a copy of all manifests and certificates of disposal.
